To Whom It May Concern,

Our Company, Brahma Compression supplies natural gas compressors for boosting gas well production. We engaged Synergy Stockpile's prospecting services in February 06 and have been extremely pleased with the results.

For the first two months we used Synergy Stockpile to create and confirm a contact list of all the buyers throughout our industry of which they accomplished successfully. We received a comprehensive database with hundreds of buyers found throughout our industry *and* we received the current status of each buyers timing.

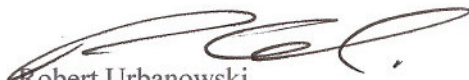

In April we expanded Synergy Stockpile's involvement and ask them to book our sales people qualified on-site appointments and we have been amazed with the results. Do date Synergy Stockpile has booked us over 50 on-site appointments.

Some benefits we have received since using Synergy Stockpile's prospecting service include:

- effective sales appointments
- major growth with little marketing costs
- we have up-to-date knowledge of why buyers are interested and why buyers are not interested

We believe Synergy Stockpile's prospecting service is a low risk, cost effective and intelligent solution for any business looking to expand and we highly recommend their services.

Sincerely,

Robert Urbanowski
Vice President Sales and Marketing
